MONTE CARLO 6

SPACE, STYLE AND PREMIUM QUALITY

GIVRAND GRAND LARGE, APRIL 2016

The Monte Carlo 6 is the last of the premium line created by Beneteau in 2013 and, since she was launched a few months ago, she has won over the most demanding boaters worldwide. Elected boat of the year in the 'Flybridge up to 60ft' category at the 'Motor Boat Awards' organized in London last January, the MC6 has carved itself a niche due to its style, services and top quality build. There is no doubt – she has all the qualities of a yacht.

You are captivated by the amazing and inspiring harmony as you enter the Monte Carlo 6. This derives from the luxury world of the Monte Carlo Yachts brand. Her living spaces are incredibly generous, her layout combines communication and intimacy, her materials and trims are noble, all making your lifestyle on board exceptional for this size of boat.

60 Feet of Style and Performance

Boasting the best of the yacht tradition, this splendid motor cruiser has an attractively flared-out hull design, a surprising recess of the side windows in relation to the windshield, as well as round hull portholes, and she catches everyone's eye at sea.

Recognized as one of the most spacious in her category, the flybridge of the Monte Carlo 6 is designed like a huge terrace. Accessed by a stairway starboard of the cockpit, its large lounge can hold up to ten people. Large sunbathing areas, comfortable seats to enjoy driving and excellent protection afforded by the T-top are all features that make this an ideal living space.

With two sun-loungers on the foredeck and an interior layout offering a choice of two or three good-sized cabins, plus a crew cabin, the Monte Carlo 6 is the height of luxury accommodation. The interior boasts an open design oozing with character, in which there is seamless communication between the galley located at the centre of the boat and the huge lounge and central driving station.

Aft, the large owner suite with ensuite shower room affords great privacy.

Underway, the MC6 equipped with two Cummins 600HP engines, reaches a top speed of 28 knots and has all the torque needed for dynamic acceleration. The Zeus pod system significantly improves the boat's performance, while delivering a 30% fuel economy, 15% faster cruising speed and a top speed 15% higher in comparison to a traditional shaft line system.

BENETEAU

High Quality Manufacture

Designed by the talented Italian duo, Nuvolari-Lenard, the Monte Carlo range unites the traditional know-how of the Vendée workshops with intelligent engineering and modern industrial processes. Perfectly controlled by Beneteau boatyards, this combination of technology and tradition is echoed in the way the woodwork is handled. The interior cabinetwork is well-designed in brushed oak and the wood used for the exterior is teak, following yachting codes and traditions – Everything on board the MC6 is the paragon of precision and top quality finish.

With this boat – the fruit of 130 years of boatbuilding – Beneteau has succeeded in completely renewing the idea of luxury in the motor cruiser segment, while delivering technologically innovative solutions.

Planned for next September, the sport version of the Monte Carlo 6 will complete this Mediterranean-inspired line. With an opening hardtop, the MC6 S will boast an open-air lounge of staggering proportions.
